EDUCATION

Virginia Tech, B.S. in Computer Science *Expected Graduation: May 2028*
Northern Virginia Community College, A.S. in Computer Science *May 2026*
GPA: 3.70/4.0 | Honors: Presidential Scholar, Dean's List

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- AWS Certified Cloud Practitioner
- Google Project Management Professional Certificate

WORK EXPERIENCE

IT Support Technician Intern | Prince William County Public Schools *July 2025 - August 2025*

- Resolved 5-10 daily support tickets across Windows and iOS by applying systematic troubleshooting to restore user access and device function.
- Deployed and configured 100+ devices for faculty and staff.
- Standardized steps for 5+ recurring issue types by translating technical problems into team documentation.
- Tracked inventory and status for 300+ devices through their asset lifecycle.
- Escalated recurring access and system issues with clear technical detail and documented resolution steps.

Specialty Supervisor | The Home Depot *April 2025 - June 2026*

- Identified the causes of delays in the customer quote process across four departments and helped implement a coordination process which reduced turnaround from 5 days to 3-4 days.
- Delivered customer projects on schedule across four departments.
- Trained and mentored 8-10 associates in task execution and customer communication.
- Resolved customer and operational issues with timely, coordinated solutions.

PROJECTS

Clear Home | GDG Build with AI x Hacktoberfest 2026 (team of four) *clearhome.live*

1st overall, Hacktoberfest Hack Day Blacksburg x GDG at Virginia Tech

- Co-built an AI housing assistant for Northern Virginia and Blacksburg by matching people to verified affordable housing and emergency resources.
- Kept Gemma 4 answers constrained to a hand-verified listing set, and streamed them live with a non-AI fallback when the model is unavailable.
- Deployed the site on Google Cloud Run with API keys in Secret Manager, and added a daily job that updates listings and redeploys the site.

AWS Cloud Infrastructure Project

- Segmented network access with two public subnets, two route tables, and three security groups.
- Applied least-privilege access with a developer policy scoped to tagged instances and an explicit deny on tag changes.
- Deployed two EC2 instances and administered them remotely over Linux.
- Hosted a static website on S3 and reviewed its public access settings.

AWS Serverless Automation Project

- Built a serverless workflow to route uploads to one of three Lambda functions by file type and folder.
- Replaced polling with event-driven processing by connecting three S3 event notifications to Lambda, so compute runs while bucket is idle.
- Validated five upload scenarios and resolved five upload and deployment issues using CloudWatch logs.
- Scoped each Lambda role to read only its own input files and write only to the output folder.

LEADERSHIP

Instructor/Student | Pencak Silat Indonesian Martial Arts *August 2018 - Present*

- Coached 15-20 students weekly across three classes.
- Developed seven students who earned competition placements, including five first-place finishes.
- Earned 13 competition medals, including first place at the 2019 North America Championship.

SKILLS

Operating Systems: Windows, Linux, OS Configuration, Command-Line Tools, System Administration
IT Support and Remote Access: Hardware and Software Troubleshooting, Device Deployment, User Accounts, Access Management, Remote Desktop (RDP), VPN Connectivity Troubleshooting
Cloud and Infrastructure: AWS EC2, S3, IAM, Lambda, VPC, Event-Driven Architecture, Google Cloud Run
Monitoring and Troubleshooting: CloudWatch Monitoring, System Health Checks, Log Analysis, Troubleshooting Documentation
Networking and Security: TCP/IP, DNS, HTTP/HTTPS, Routing, Ports, Security Groups, Network Segmentation, Least-Privilege Access
Programming and Automation: Python Scripting, PowerShell Scripting, JavaScript, Flask
Tools: Git, Microsoft 365, Jamf Pro, VS Code, Terminal, Figma, Gemma 4 (Gemini API)
Professional: Problem-Solving, Technical Documentation, User Training, Stakeholder Communication, Cross-Functional Teamwork
