EDUCATION

Virginia Tech, B.S. in Computer Science *Expected Graduation: May 2028*

Northern Virginia Community College, A.S. in Computer Science *May 2026*

GPA: 3.70/4.0 | Honors: Presidential Scholar, Dean's List

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- AWS Certified Cloud Practitioner
- Google Project Management Professional Certificate

WORK EXPERIENCE

IT Support Technician Intern | Prince William County Public Schools *July 2025 - August 2025*

- Resolved 5-10 daily support tickets across Windows and iOS by applying systematic troubleshooting to restore user access and device function.
- Supported user access and device operations across 100+ devices by managing technology tools for faculty and staff.
- Standardized steps for 5+ recurring issue types by translating technical problems into team documentation.
- Maintained inventory and status records for 300+ devices by tracking each device through its asset lifecycle.
- Assisted faculty and staff with device deployment, configuration, and account access.
- Escalated recurring access and system issues with clear technical detail and documented resolution steps.

Specialty Supervisor | The Home Depot *April 2025 - June 2026*

- Helped optimize operations and workflow across four departments, supporting a reduction in customer quote turnaround from 5 days to 3-4 days, and provided feedback and support to team members.
- Delivered multiple customer projects on schedule by gathering requirements and coordinating cross-department delivery.
- Improved task execution and customer communication for 8-10 associates by training and mentoring them.
- Resolved customer and operational issues by evaluating options and coordinating timely solutions.

PROJECTS

Clear Home | GDG Build with AI x Hacktoberfest 2026 (team of four) *clearhome.live*

1st overall, Hacktoberfest Hack Day Blacksburg x GDG at Virginia Tech

- Co-built an AI housing assistant for Northern Virginia and Blacksburg by matching people to verified affordable housing and emergency resources.
- Kept Gemma 4 answers grounded in a hand-verified listing set, and streamed them live with a non-AI fallback when the model is unavailable.
- Deployed the site on Google Cloud Run with API keys in Secret Manager, and added a daily job that updates listings and redeploys the site.

AWS Cloud Infrastructure Project

- Segmented network access across two public subnets, two route tables, and three security groups by restricting traffic to required ports and paths.
- Applied least-privilege access for two users, one group, two roles, and four policies, limiting each identity to the permissions it needs.
- Deployed and administered two EC2 instances with remote Linux administration and troubleshooting.
- Reduced exposure risk for an S3-hosted static website by assessing its public access settings.
- Documented architecture, access controls, and security configuration so the deployment can be repeated.

AWS Serverless Automation Project

- Reduced manual file handling by building a serverless workflow with Lambda and S3 that processes uploads automatically.
- Replaced polling with event-driven design by connecting three S3 event notifications to Lambda functions, reducing idle compute costs.
- Validated processing across five upload scenarios and resolved 10+ execution failures using CloudWatch logs.
- Kept automation secure by reviewing function permissions and event-driven access requirements.
- Documented workflow behavior, test results, and troubleshooting steps for repeatable deployment.

LEADERSHIP

Instructor/Student | Pencak Silat Indonesian Martial Arts *August 2018 - Present*

- Coached and instructed 15-20 students weekly across three classes in Pencak Silat techniques and competition preparation.
- Developed seven students who earned competition placements, including five first-place finishes.
- Earned 13 competition medals, including first place at the 2019 North America Championship.

SKILLS

Operating Systems: Windows, Linux, OS Configuration, Command-Line Tools, System Troubleshooting, System Administration
IT Support and Remote Access: Hardware and Software Troubleshooting, Device Deployment, User Accounts, Access Management, Remote Desktop (RDP), VPN Connectivity Troubleshooting
Cloud and Infrastructure: AWS EC2, S3, IAM, Lambda, VPC, CloudWatch, Event-Driven Architecture, Google Cloud Run
Monitoring and Troubleshooting: CloudWatch Monitoring, System Health Checks, Log Analysis, Troubleshooting Documentation
Networking and Security: TCP/IP, DNS, HTTP/HTTPS, Routing, Ports, Security Groups, Network Segmentation, Least-Privilege Access
Programming and Automation: Python Scripting, PowerShell Scripting, JavaScript, AWS Lambda, Flask
Tools: Git, Microsoft 365, Jamf Pro, VS Code, Terminal, Figma, Gemma 4 (Gemini API)
Professional: Problem-Solving, Technical Documentation, User Training, Stakeholder Communication, Cross-Functional Teamwork
